The Jagiellonian University is the second oldest university in Central Europe, established in 1364. It is presently one of largest universities in Poland.

City

Kraków is located in Southern Poland. The city dates back to the 7th century and was once the capital of Poland. It is rich in cultural heritage and has many historic monuments and buildings. Fortunately, the city survived the Second World War almost intact. The Old Town is famous for its enchanting atmosphere with a number of theaters, museums, restaurants and cafeterias within sight of Medieval and Renaissance buildings.

Kraków has good flight connection with major cities in Europe and overseas via the *John Paul II International Airport* located close to the city center.

- Atmosphere Processes and Global Climate Connections
- Cryospheric Changes: Drivers and Consequences
- Marine Processes and Variability
- Terrestrial Ecosystem Responses to Environmental Stressors
- Impact of Global Changes on Arctic Societies

Cross-Cutting Sessions

- Arctic People and Resources: Opportunities, Challenges and Risks
- Applying Traditional Knowledge to Better Understand the Changing Arctic
- Arctic System Science for Regional and Global Sustainability
- Changing North: Predictions and Scenarios

The Arctic Science Summit Week

The ASSW is the annual gathering of international organizations engaged in supporting and facilitating Arctic research. Its purpose is to provide opportunities for international coordination, collaboration and cooperation in all fields of Arctic science and to combine science and management meetings. Side meetings organized by groups with interest in the Arctic science and policy will also be held within the week. One of them is already planned: The Association of Polar Early Career Scientists (APECS) will offer a one-day career development workshop during the ASSW 2013. Details will be published closer to the event:
