## Brief Introduction of APS

ADVANCES IN POLAR SCIENCE is an international, peer-reviewed journal jointly sponsored by the Polar Research Institute of China and Chinese Arctic and Antarctic Administration. It is a comprehensive academic journal dedicated to the presentation of multi-disciplinary achievements in Arctic and Antarctic expeditions and research. APS is a quarterly journal published in March, June, September and December.

This journal focuses on the progress or achievement of scientific research, applied research, and technical development on the polar region, and by means of the Arctic and the Antarctica as the observing platform.

The primary purpose is to report the newly discovery, creation, theory and methodology in the disciplines such as polar glaciology, polar oceanography, polar atmospheric science, polar space physics, polar biological science, polar human medicine, polar geology and geophysics and Antarctic astronomy, and the new technologies in polar environmental observation, polar engineering project, or polar information service and management.

## Call for Papers

ADVANCES IN POLAR SCIENCE will cover all areas of polar expedition and research. The journal welcomes the submission of manuscripts that meet the general criteria of significance and scientific excellence in these subject areas: polar glaciology, polar oceanography, polar atmospheric science, polar space physics, polar biological science and polar human medicine, polar geology and geophysics, Antarctic astronomy, new technologies in polar environmental observation, polar engineering project, polar information service and management, etc.

We invite you to submit your manuscript(s) to the Scholarone Manuscript for APS (<http://mc03.manuscriptcentral.com/apsci>) for publication. We provide free access to all articles as soon as they are published, and they are available at <http://journal.polar.gov.cn/EN/>.
